# 01 Introduction

## Site analyses

Liguria

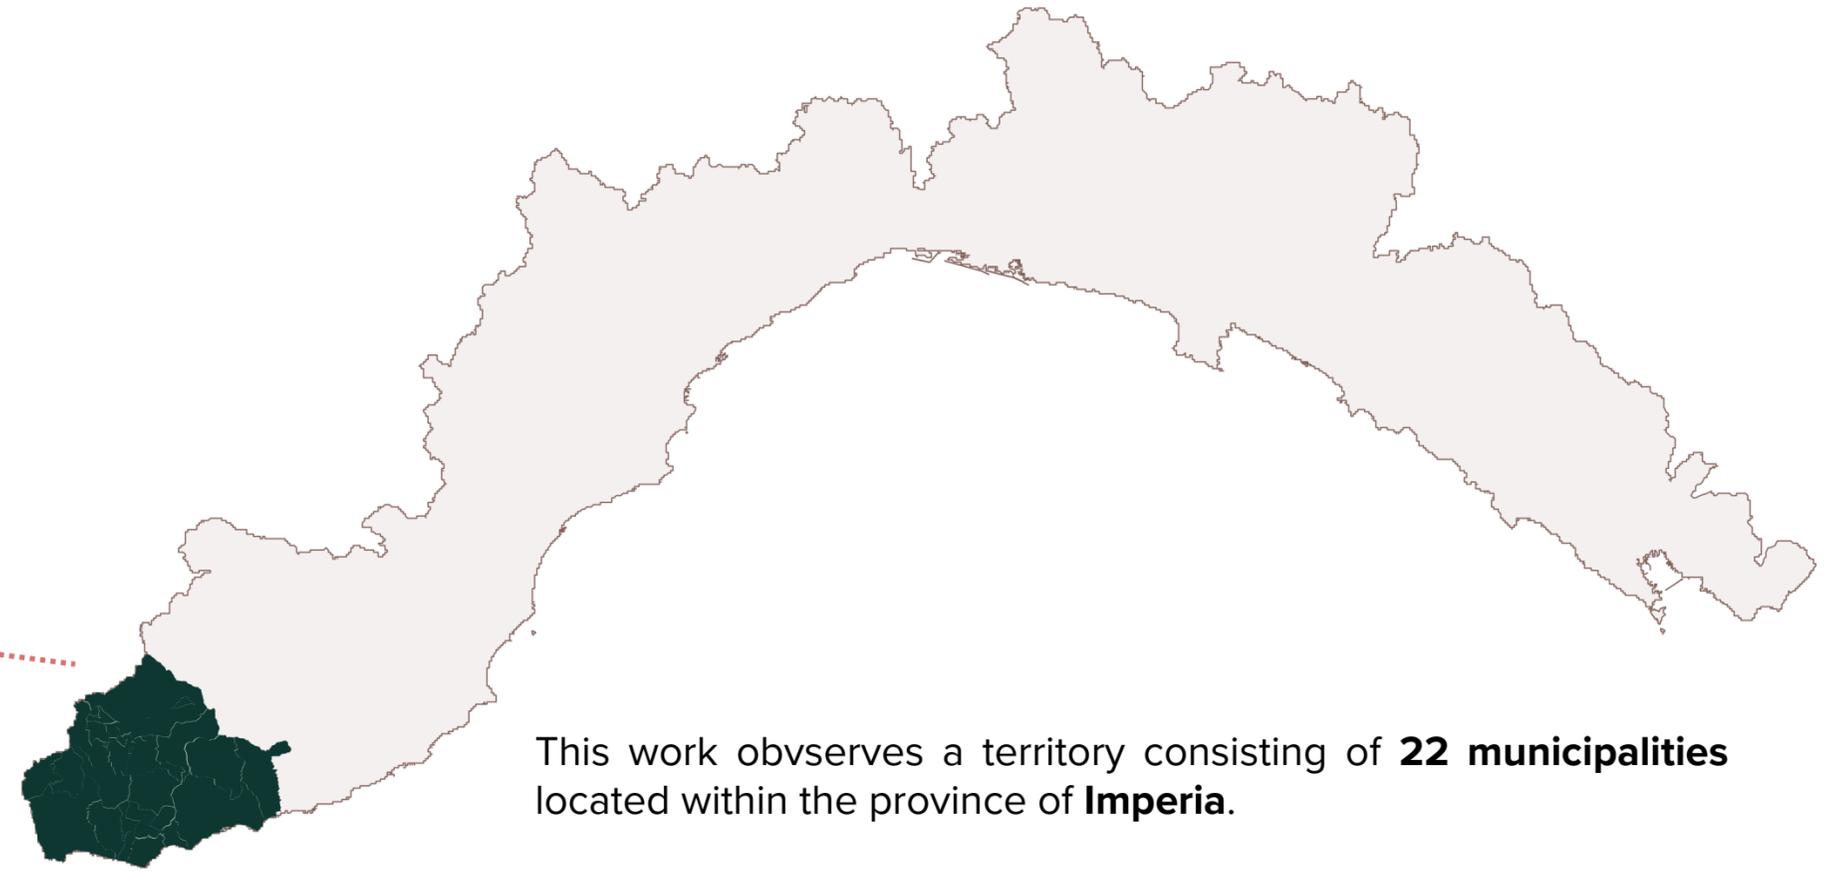

Liguria is a region in northwestern Italy.

**Area:** 5,420 square kilometers

**Population:** 1.5 million

The region's territory is administered by **4 provinces:**

- Savona,
- La Spezia,
- Imperia,
- Genoa

Municipalities of interest

This work observes a territory consisting of **22 municipalities** located within the province of **Imperia**.

The following elaboration has as its main objective the **review of local public transport** in the western part of the Province of Imperia, on the border with France. The most relevant municipalities are:

- Bordighera,
- Dolceacqua,
- Sanremo,
- Seborga,
- Ventimiglia,
- Taggia

# 01 Introduction

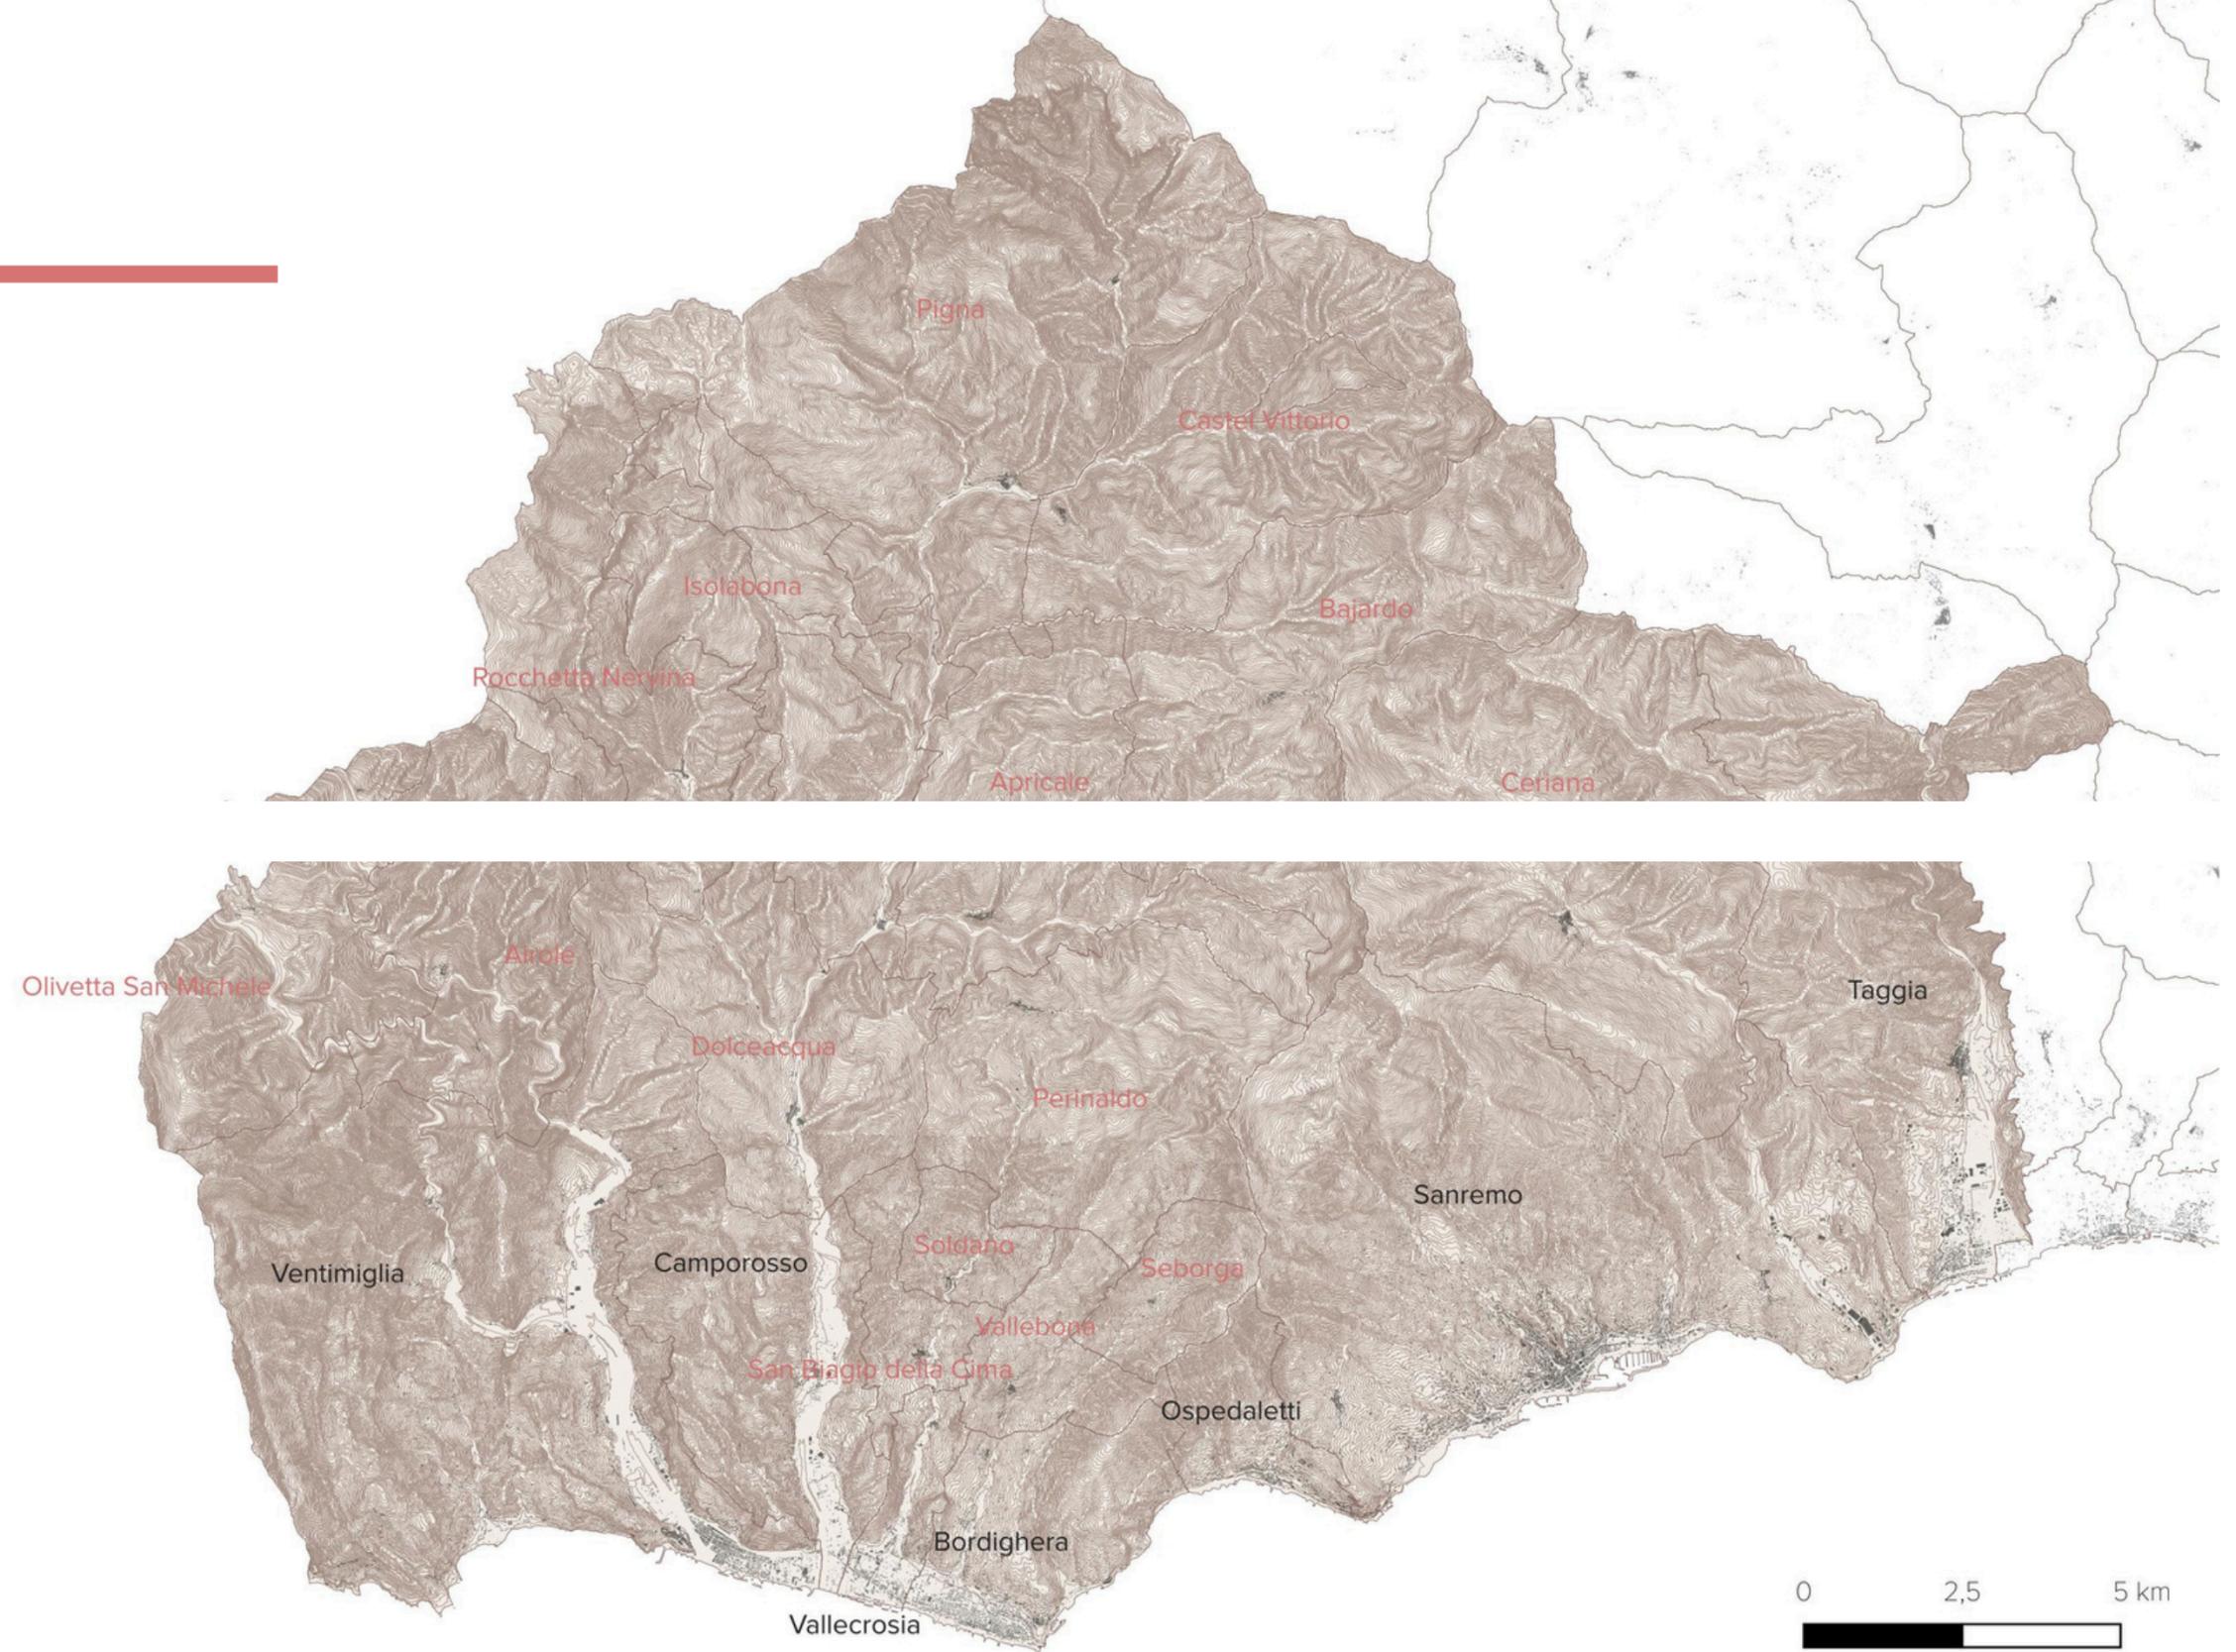

## Morphology of the territory

---

The territory has been categorised into two parts:

- the **mountain territory** (from 106 metres to 900 meters),
- the **coastal territory** (below 106 meters),

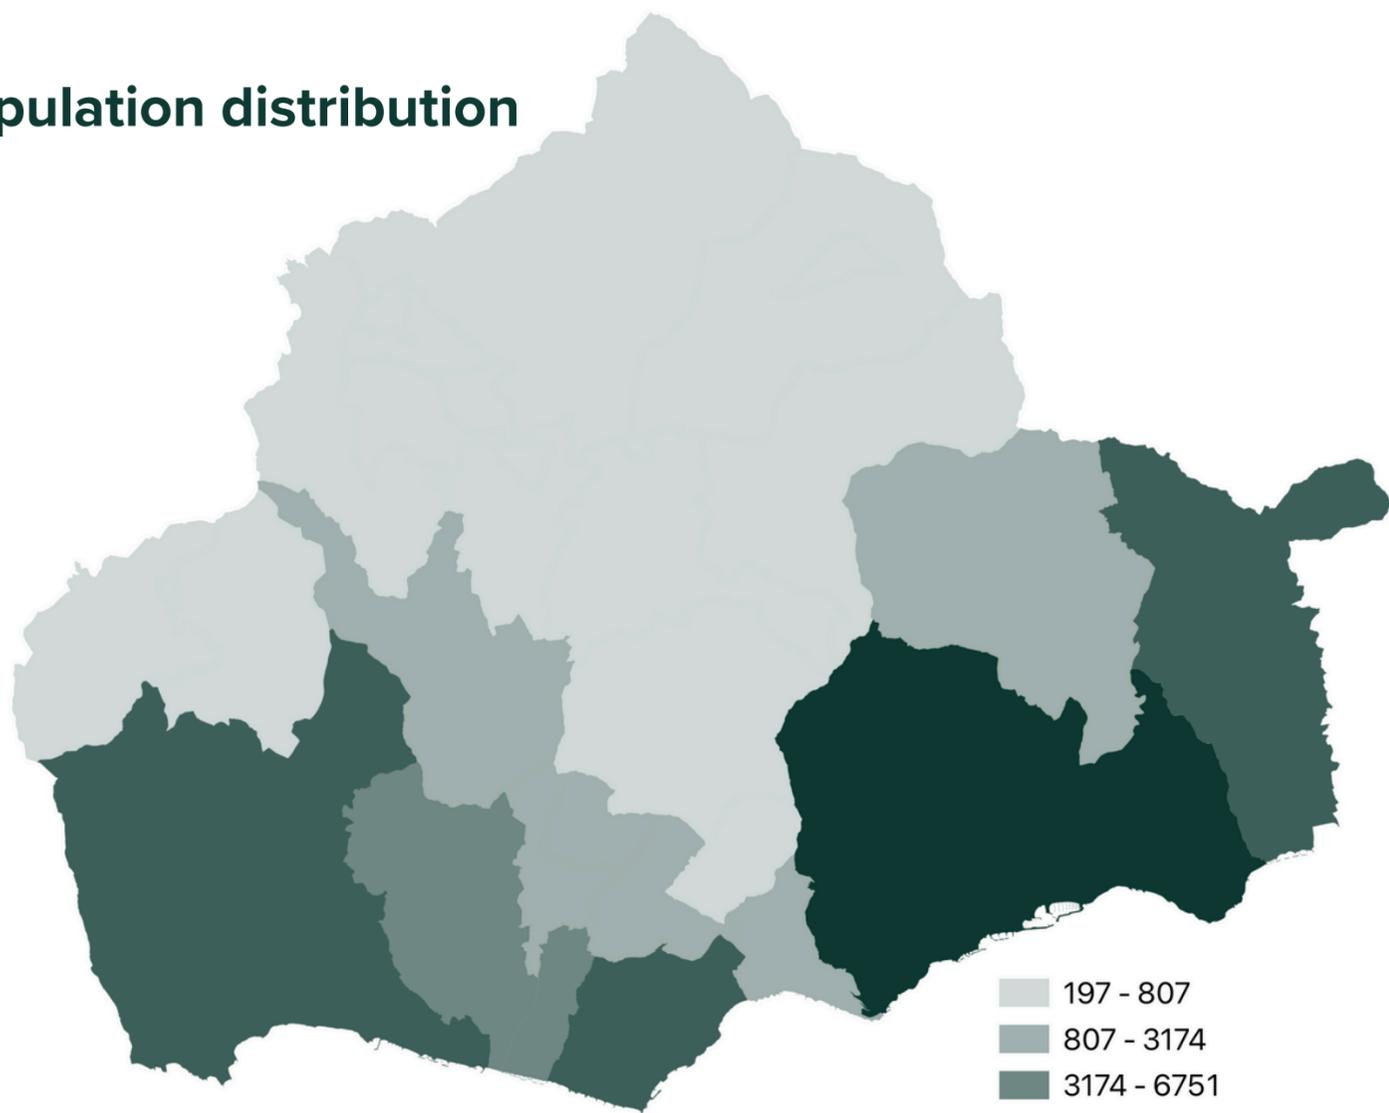

It can be seen that most urban settlements have developed along the coastline, highlighting the great difference in urbanisation between the mountain and coastal areas.

# 01 Introduction

## Demography

### Population distribution

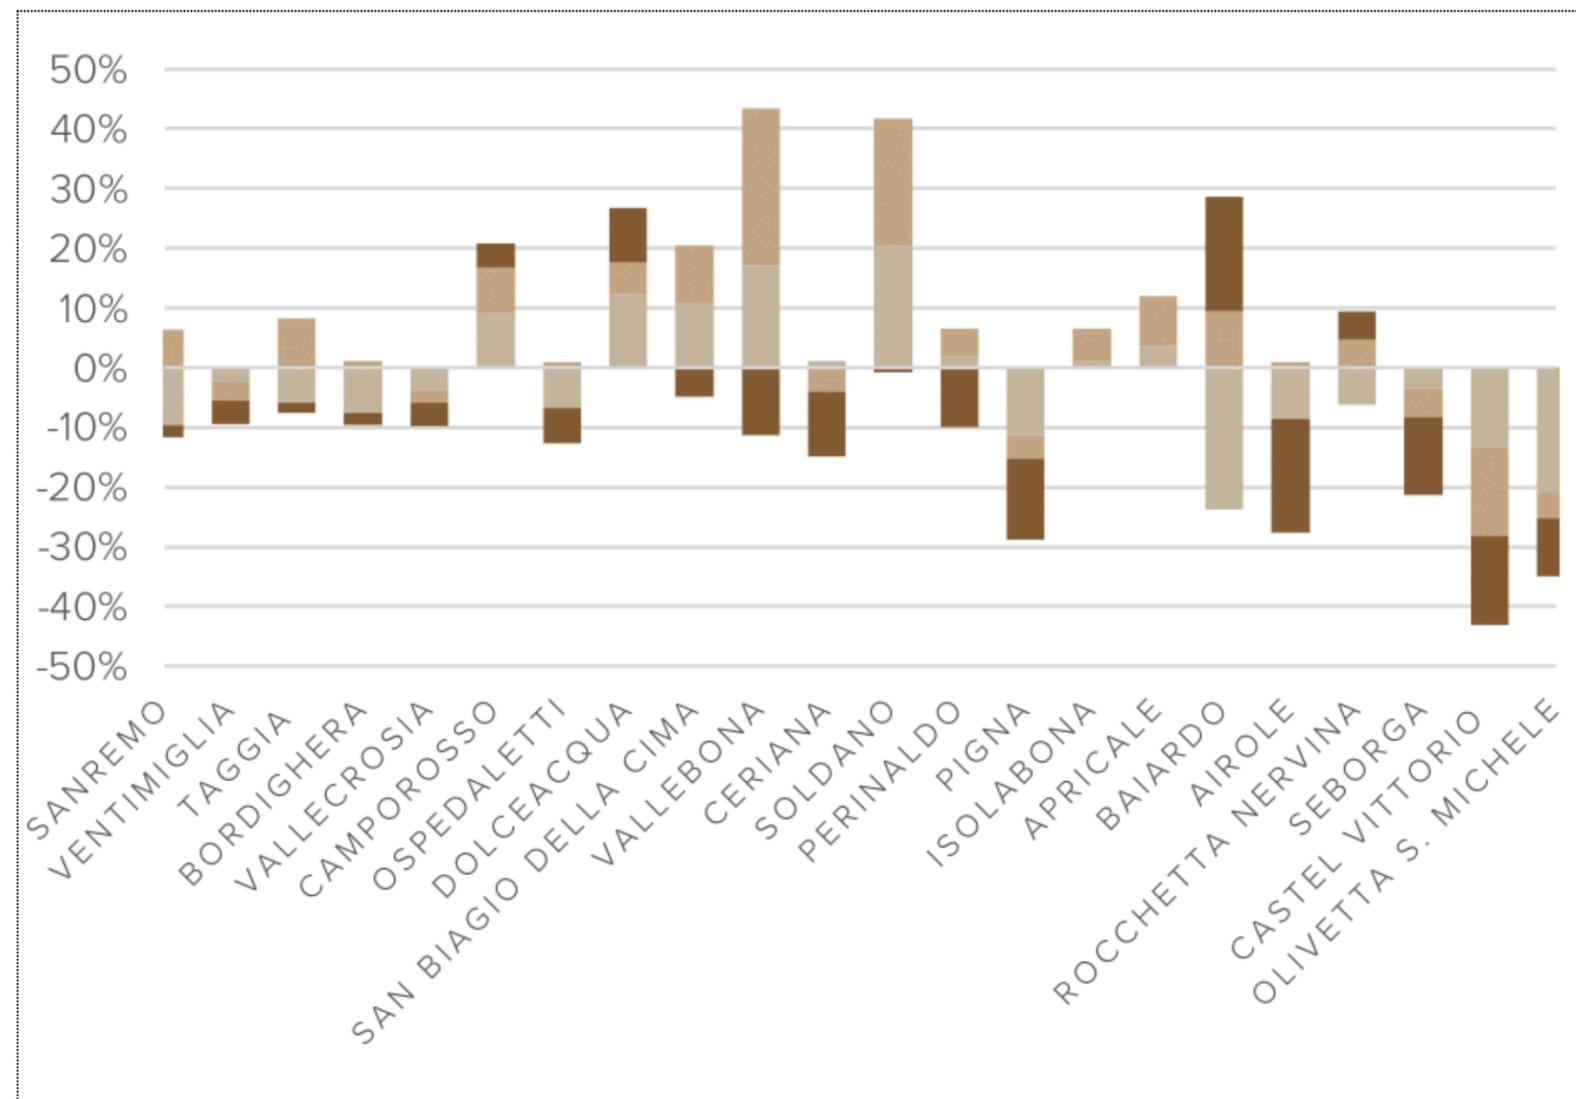

Ventimiglia  
Bordighera  
Sanremo  
Taggia

**high residentiality**

mountain municipalities

**low residentiality**

### Demographic variation

Supply and  
demand  
for transport

---

# 02 Supply and demand of transport

## Main infrastructures

The analysed territory is served by some main infrastructures:

### A10 motorway

- It is part of the European route E80, which continues into French territory.
- It connects Genoa to Ventimiglia

### 1- Genoa - Ventimiglia railway line

### 2- Wonderland railway line

1. It runs from the regional capital, Genoa, to the French border. It is one of the main Italian railway lines, and passes through three provinces: Genoa, Savona and Imperia. Ventimiglia serves as a border station, where Italian and French trains terminate.
2. An international railway line that connects Cuneo to Ventimiglia by crossing into France before passing through the Italia border again.

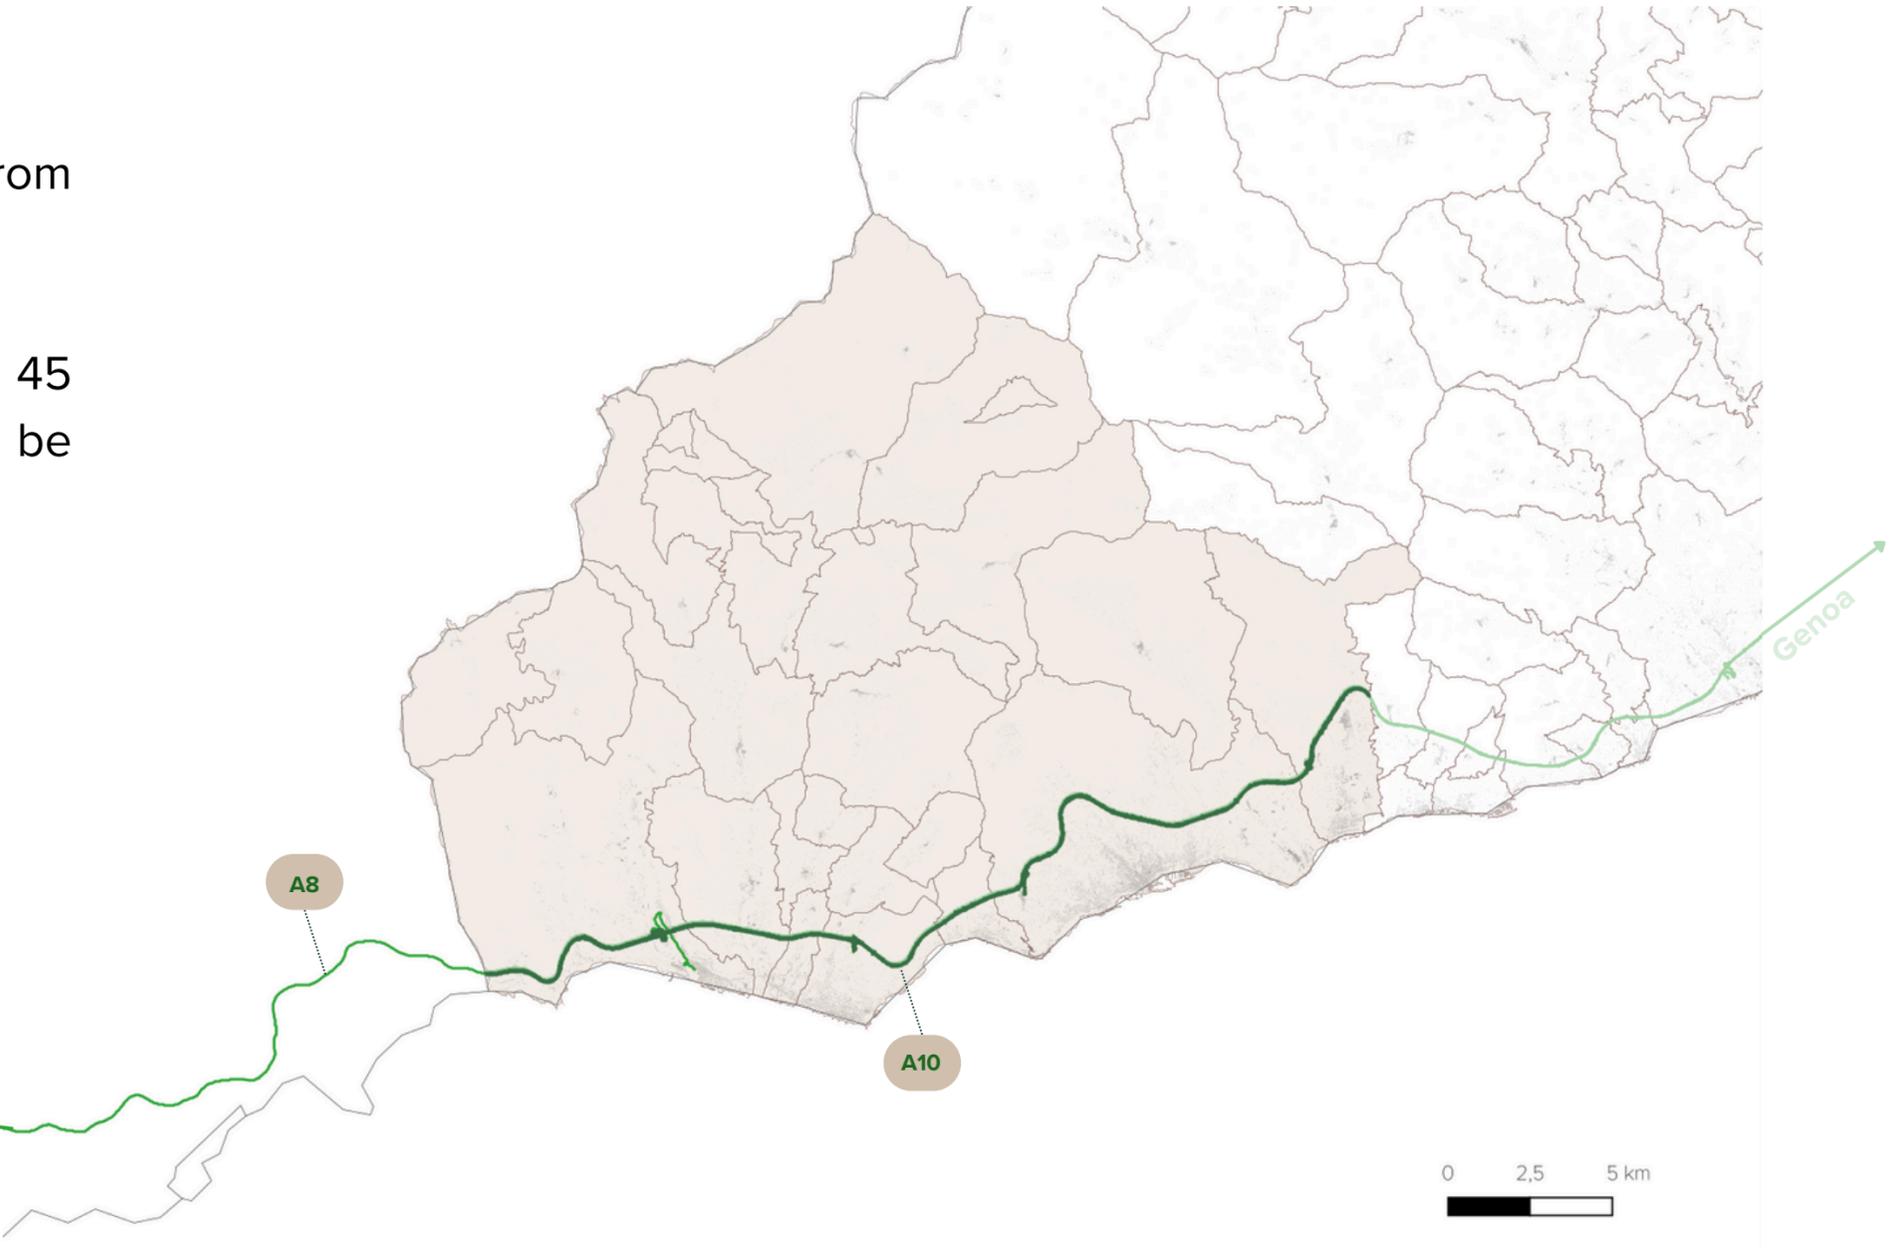

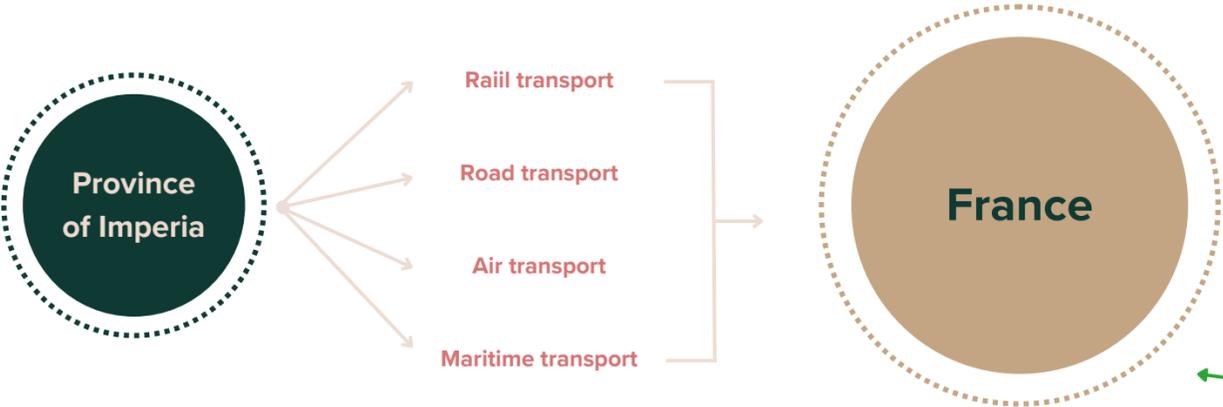

# 02 Supply and demand of transport

## Main infrastructures

The motorway connects the province of Imperia with France, from Ventimiglia the motorway changes from A10 to A8.

From Arma di Taggia to France, the travel time is about 45 minutes using the motorway. In addition, other transport can be used to reach France, such as:

- rail transport
- maritime transport
- air transport

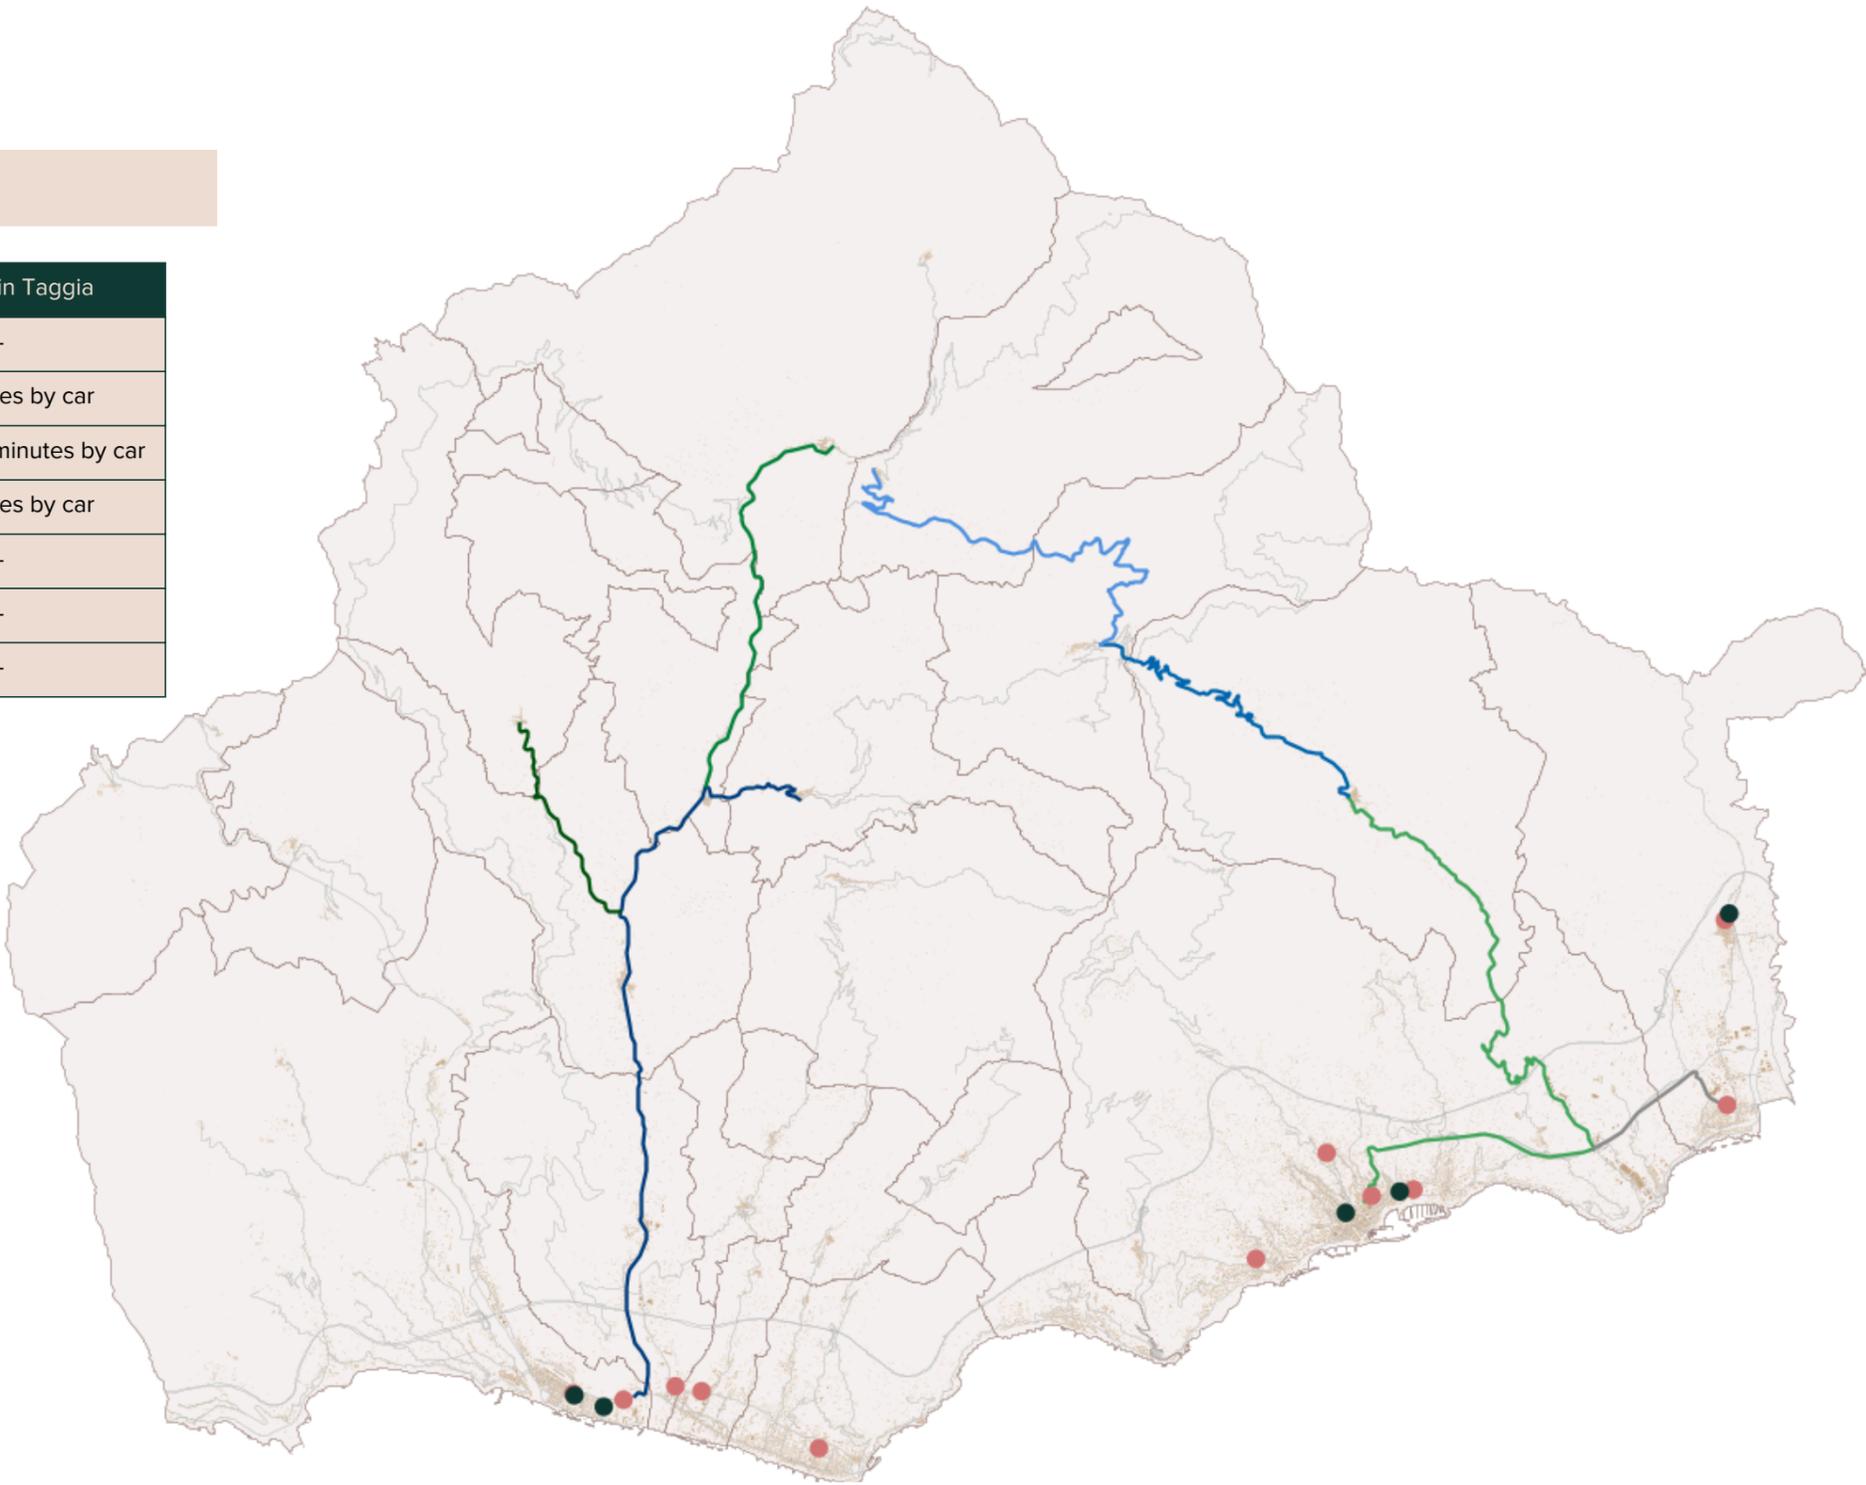

# 02 Supply and demand of transport

## Access to essential services

Time taken to reach schools from mountain municipalities

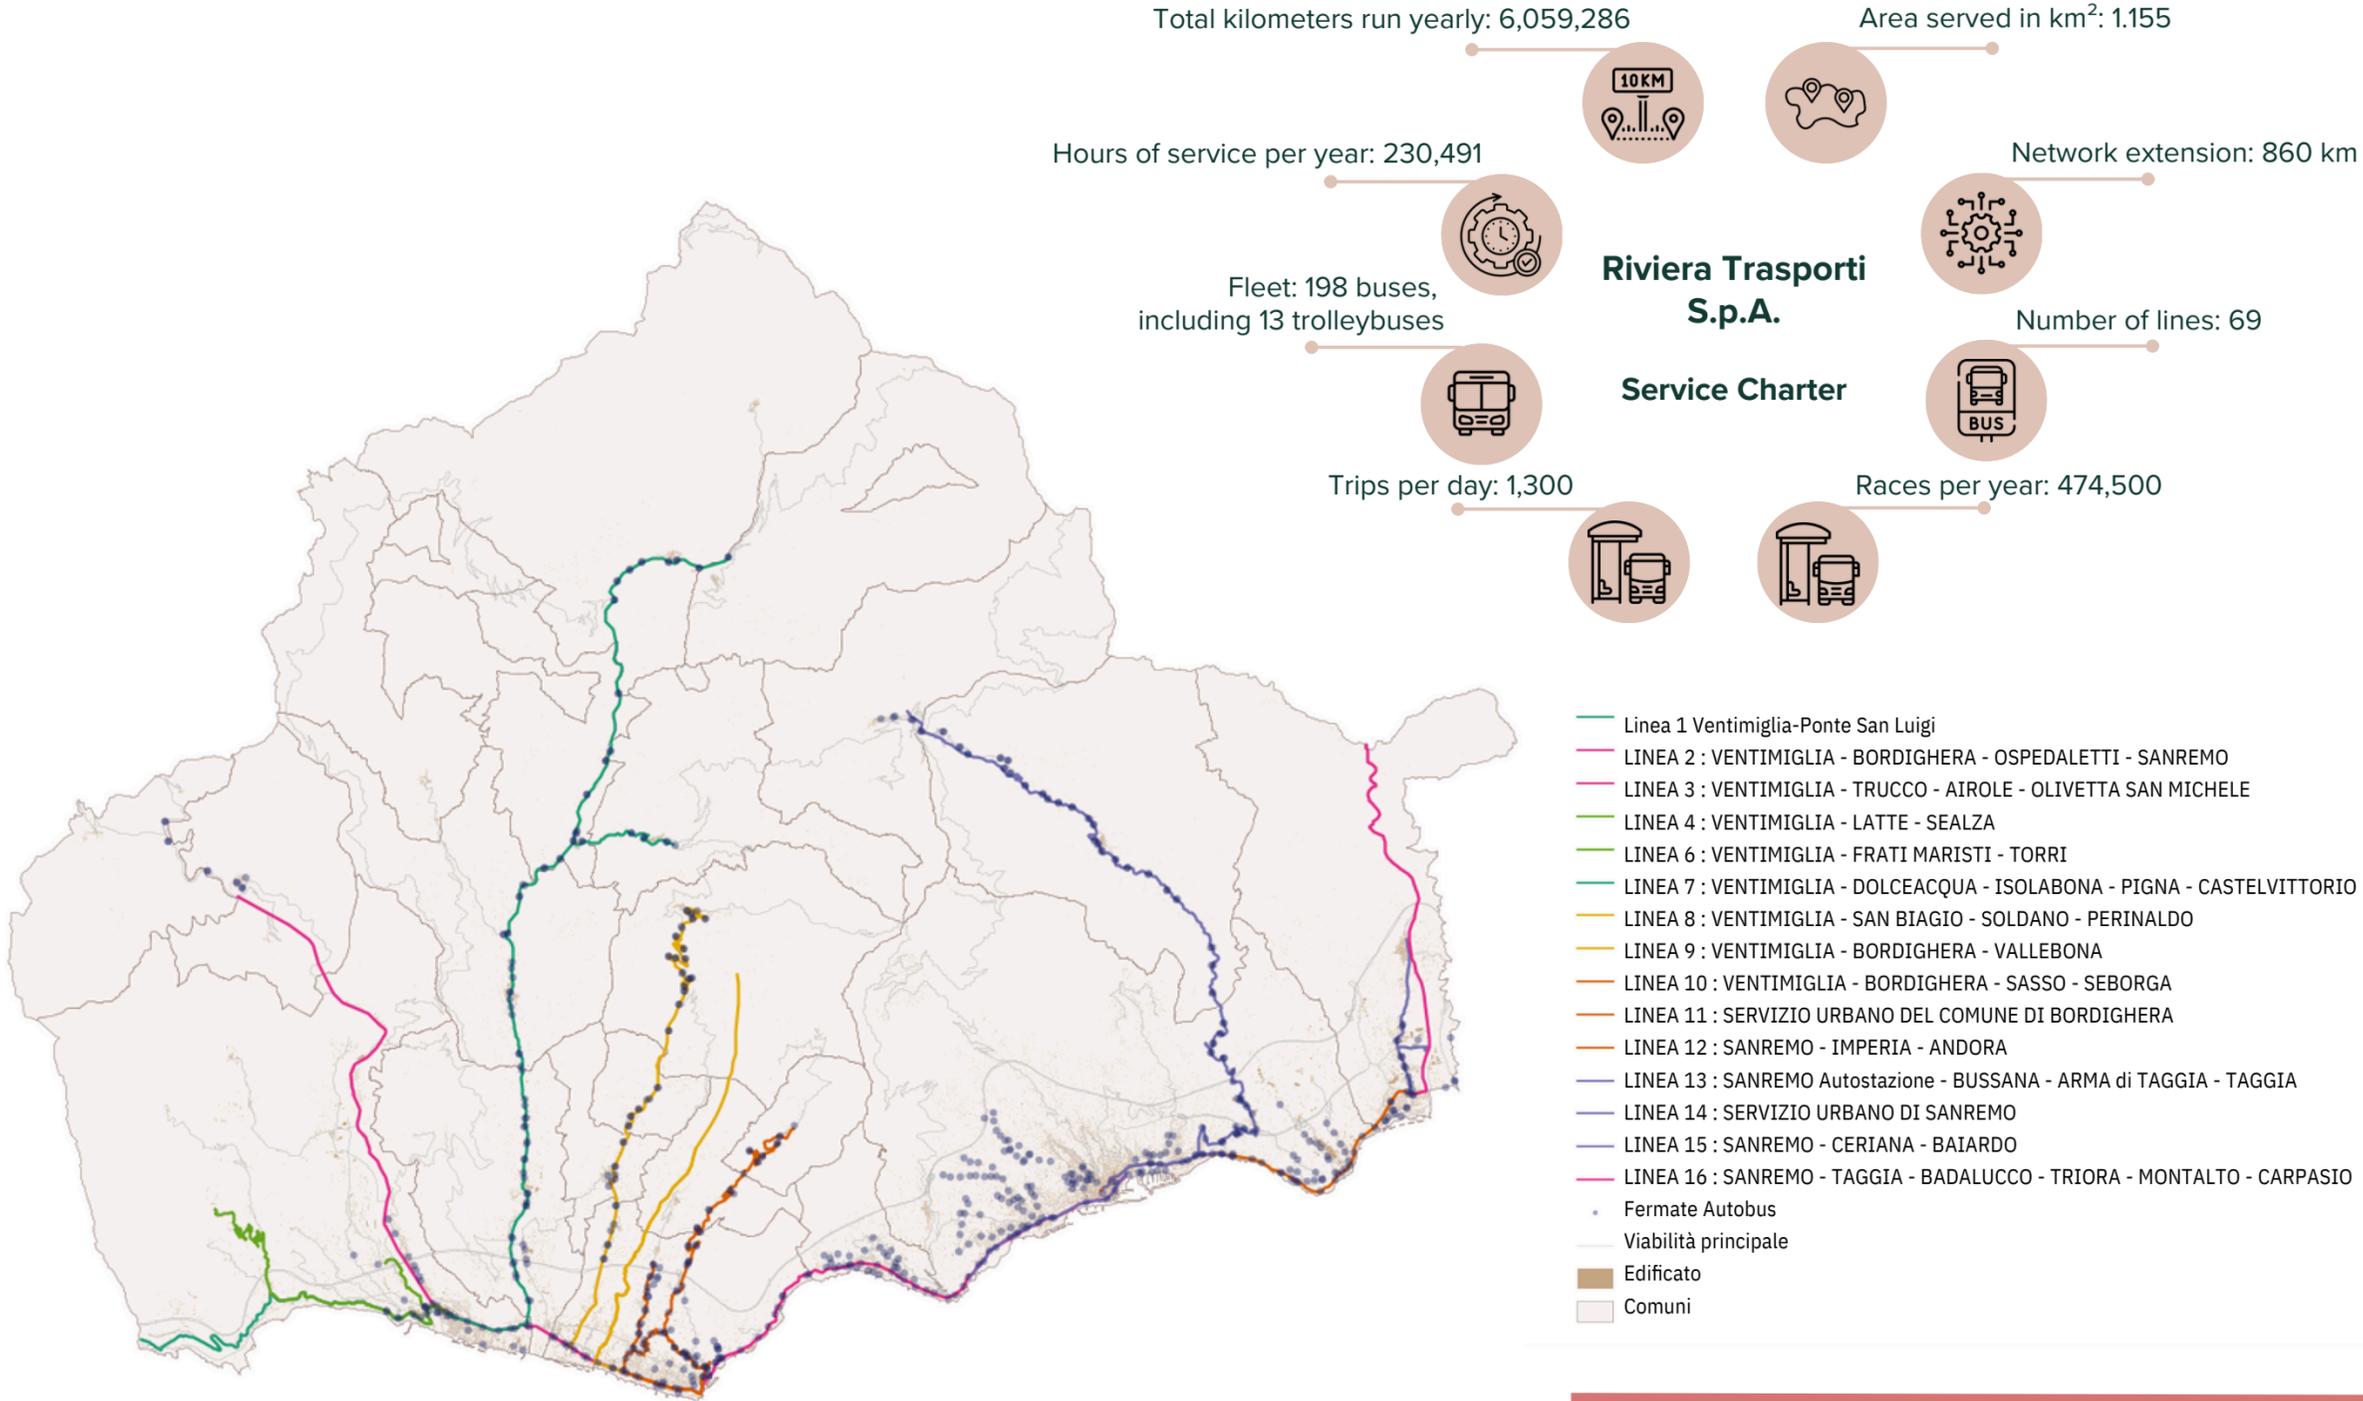

Mountain municipalities	Schools in Ventimiglia	Schools in Sanremo	Schools in Taggia
Apricale	32 minutes by car	-	-
Bajardo	-	42 minutes by car	42 minutes by car
Castelvittorio	-	1 hour and 6 minutes by car	1 hour and 6 minutes by car
Ceriana	-	26 minutes by car	24 minutes by car
Isolabona	27 minutes by car	-	-
Pigna	38 minutes by car	-	-
Rocchetta Nervina	30 minutes by car	-	-

- Route to schools from mountain municipalities
- Apricale e Isolabona - Istruzione Ventimiglia
  - Bajardo - Istruzione Sanremo
  - Castelvittorio - Istruzione Sanremo
  - Castelvittorio, Bajardo, Ceriana - Istruzione Taggia
  - Ceriana - Istruzione Sanremo
  - Pigna - Istruzione Ventimiglia
  - Rocchetta Nervina - Istruzione Ventimiglia
  - Istruzione superiore
  - Istruzione infanzia, primaria e media
  - Main roas system
  - Constructed areas
  - Municipalities

# 02 Supply and demand of transport

## Local Public Transport

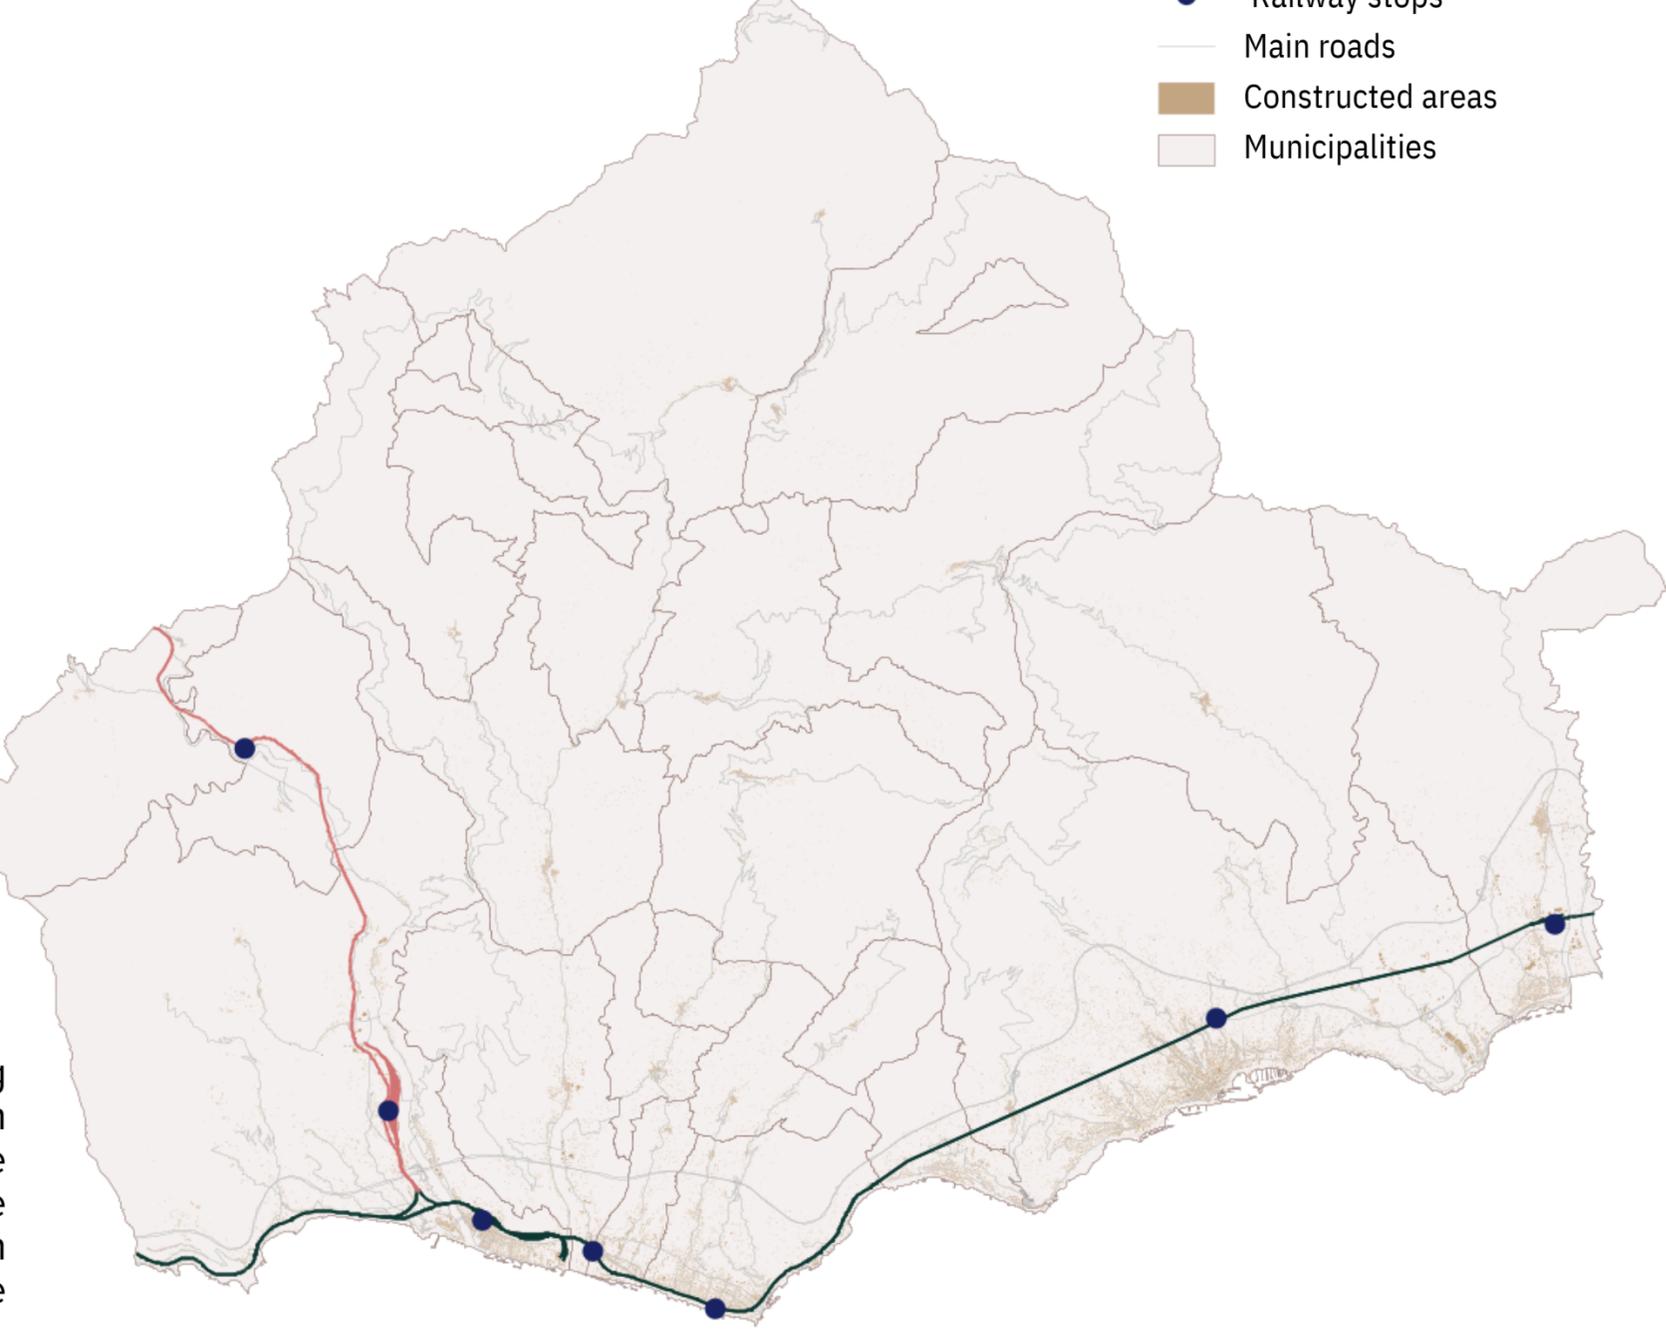

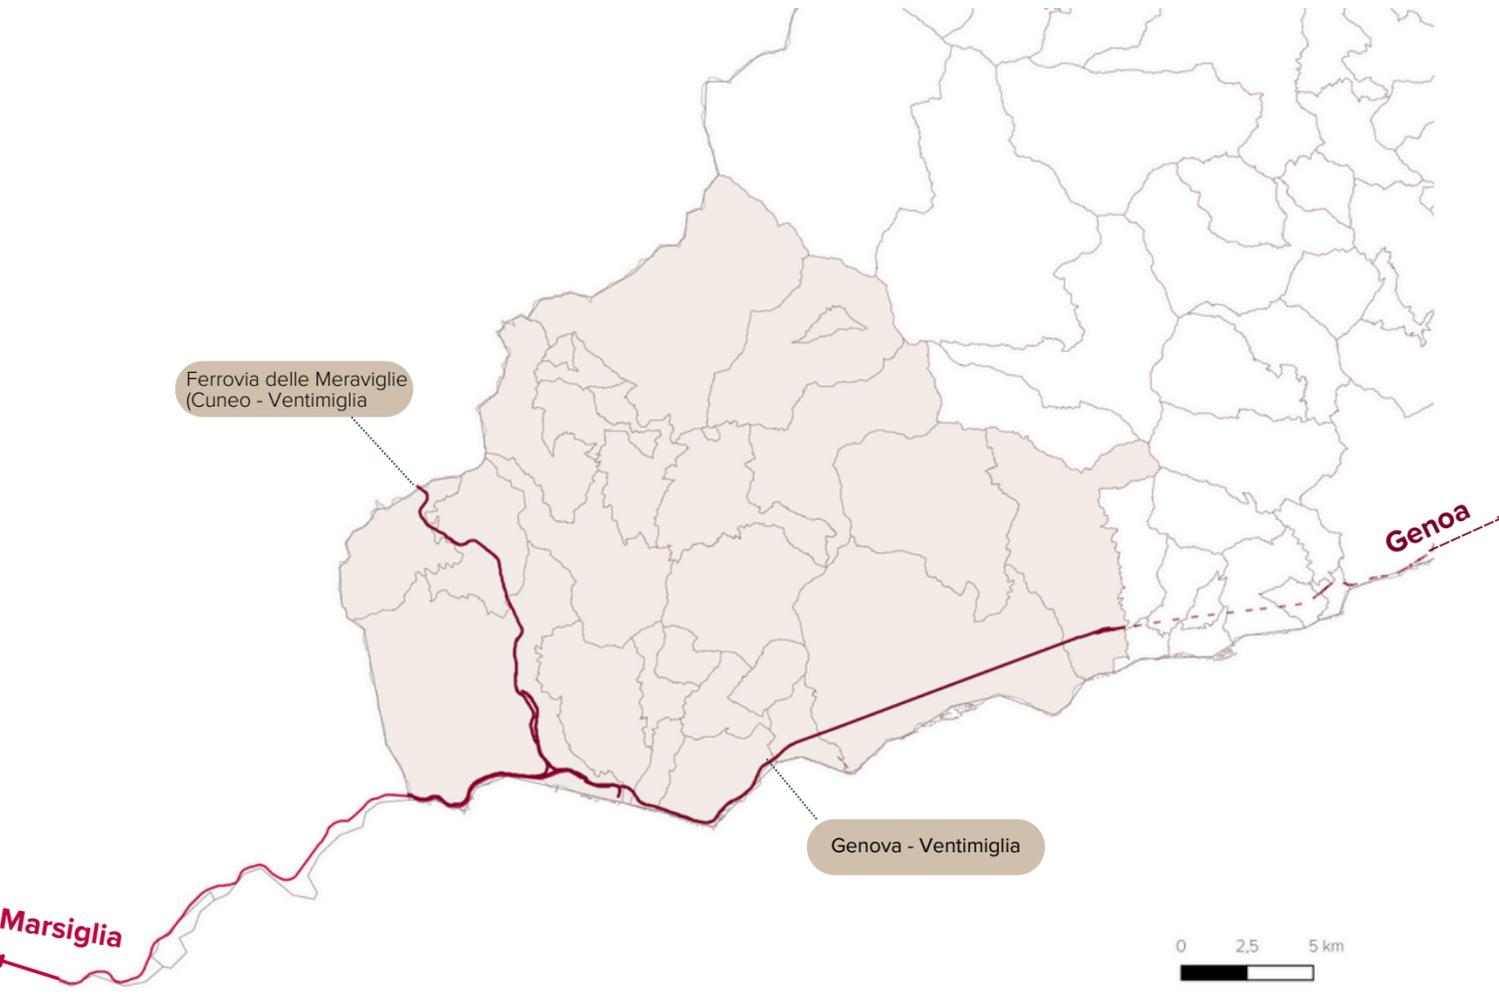

Lines	Number of rides	First race	Last race	Frequency
Line 1	8	06.25	19.30	1 hour and 50 minutes
Line 2	17	05.50	09.15	10 minutes
Line 3	10	06.20	19.00	1 hour and 20 minutes
Line 4	3	06.25	17.45	5 hours and 40 minutes
Line 5	4	06.45	18.00	3 hours and 45 minutes
Line 6	9	06.55	19.30	1 hour and 35 minutes
Line 7	14	04.50	19.10	54 minutes
Line 8	8	05.25	19.00	2 hours
Line 9	15	06.15	20.00	50 minutes
Line 10	9	06.30	20.25	1 hour and 40 minutes
Line 11	16	06.15	20.00	50 minutes
Line 12	19	06.15	10.15	15 minutes
Line 13	14	04.50	09.00	18 minutes
Line 14	22	05.48	10.30	10 minutes
Line 15	9	05.30	18.40	1 hour and 45 minutes
Line 16	11	05.20	18.00	1 hour and 35 minutes

# 02 Supply and demand of transport

## Railway

- Railway lines
  - Wonderland Railway
  - Genova-Ventimiglia
- Railway stops
- Main roads
- Constructed areas
- Municipalities

The Genoa-Ventimiglia railway line is the main coastal route in Liguria, providing connections both with the main cities of the Ligurian Riviera and the French Riviera. From Ventimiglia, there are many French regional trains operated by the SNCF company that allow frequent connections with some cities on the Côte d'Azur with a journey time that varies between 15 and 45 minutes depending on the city where you arrive. Italian and French trains are frequent enough to ensure connections every 30 minutes.

# 02 Supply and demand of transport

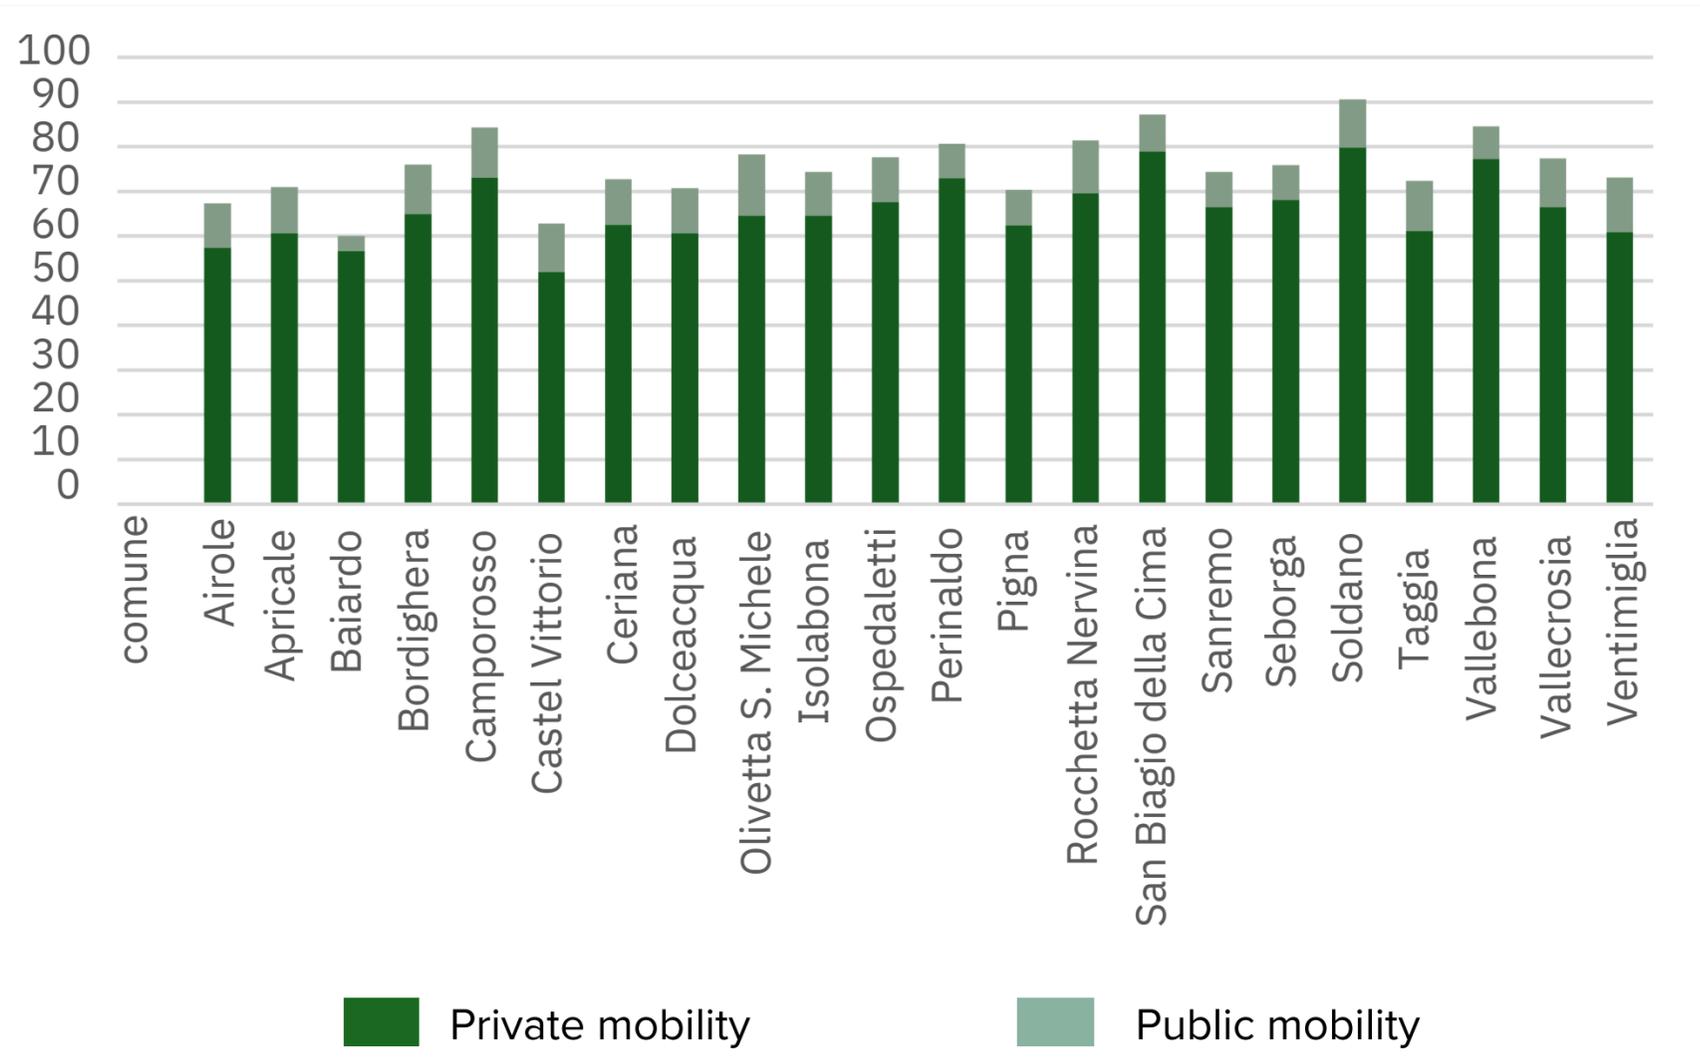

## People mobility

**Commuting population (%\*)**

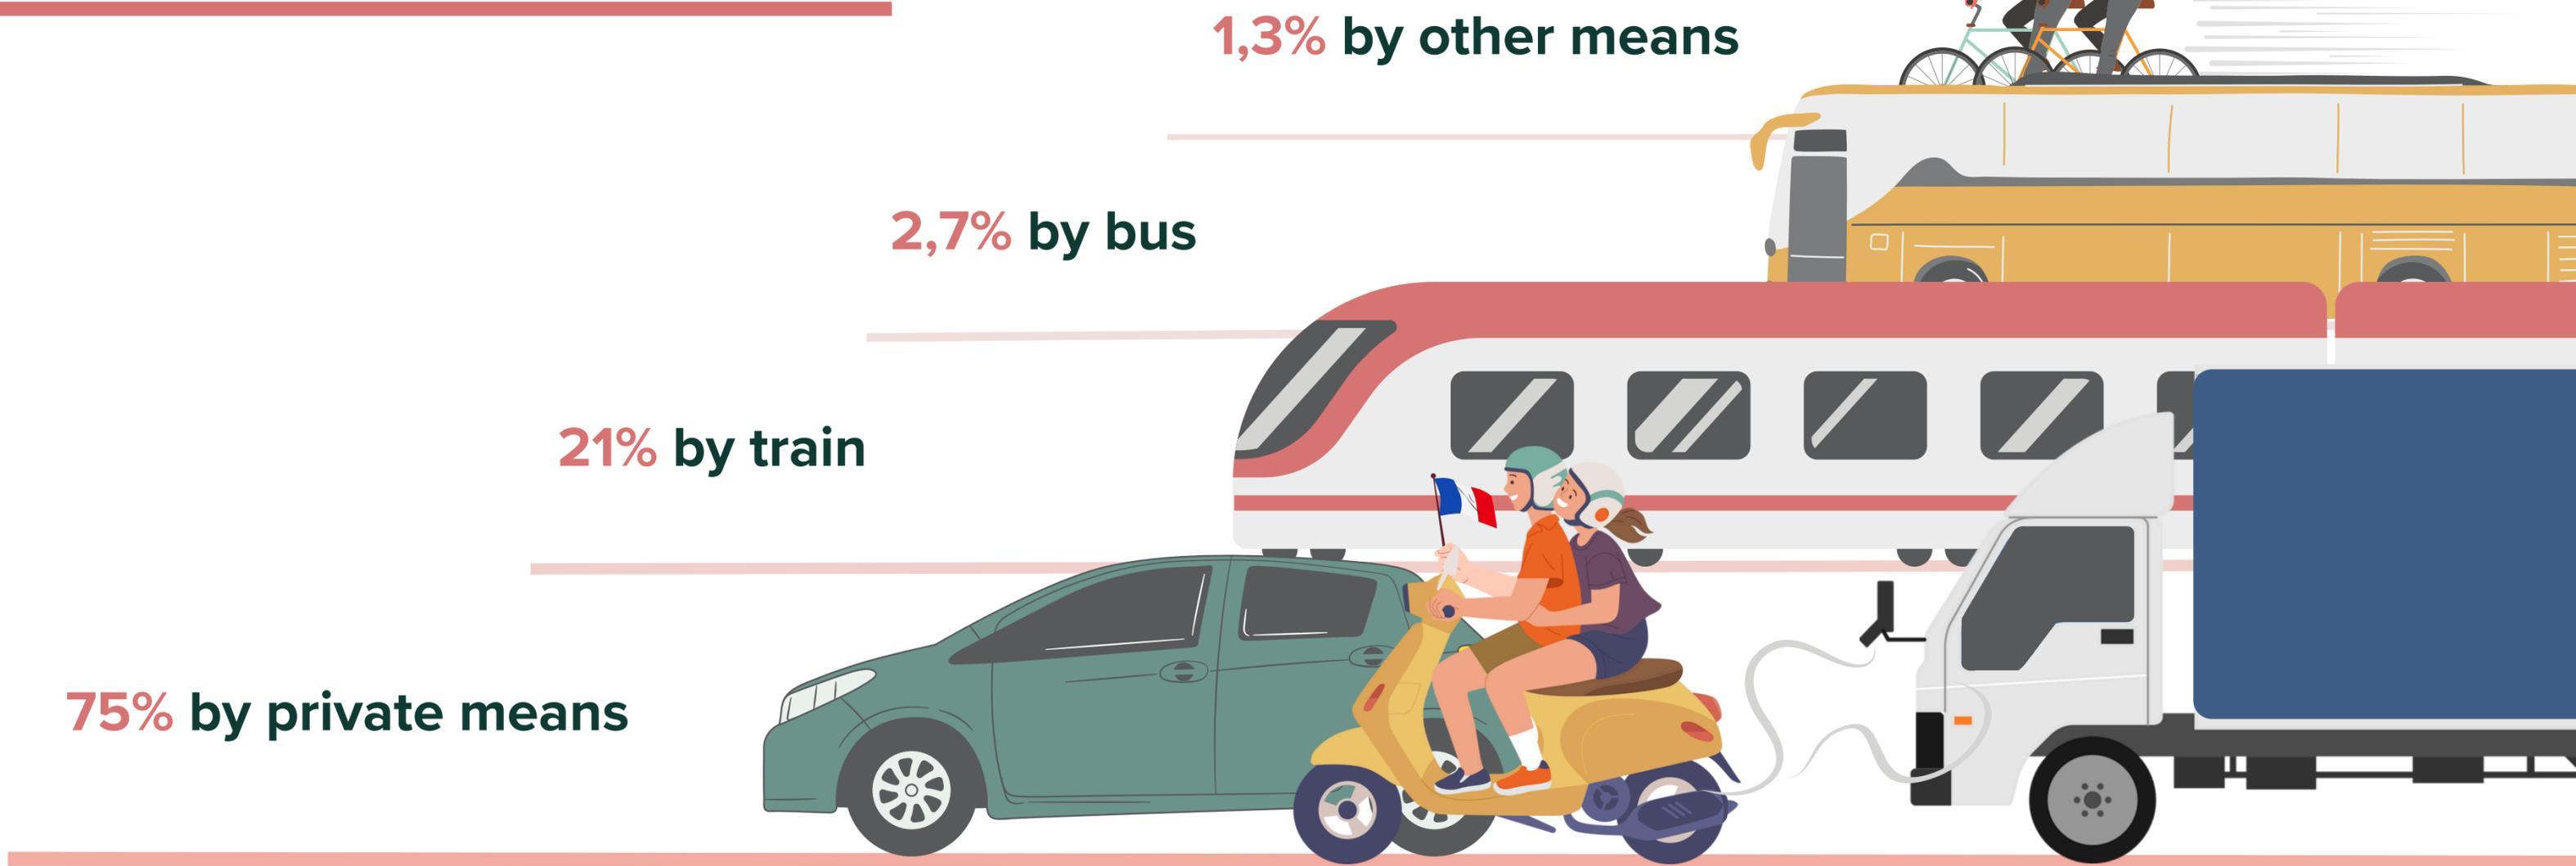

\*Over the total workers and students

### Public and private shares in mobility

# 02 Supply and demand of transport

People mobility

**4000** CROSS-BORDER COMMUTERS

1653 TO FRANCE; 2347 TO MONACO

# 02 Supply and demand of transport

## Diagnosis phase

---

### Concerns

#### 1. **Mountain areas are isolated:**

- a. Public transport is sporadic, with wait times of over an hour at least, reaching even 3 hours and more.
- b. Residents in areas like Rocchetta Nervina lack immediate access to public transport.
- c. Long travel times to essential services (e.g., schools, hospitals).

2. **Low demand:** it barely reaches 10% of mobility across municipalities, even in coastal areas.

3. **Frequent service disruption:** Students are particularly affected, often without alternative travel options.

### Solutions

1. To increase the frequencies of the bus lines to a 1h standard and to increase the frequency on the existing railway line with trains every 30 minutes
  2. To expand the bus lines to isolated municipalities
  3. Action is needed to enhance public transport through more efficient vehicles, communication and digital services
-

03

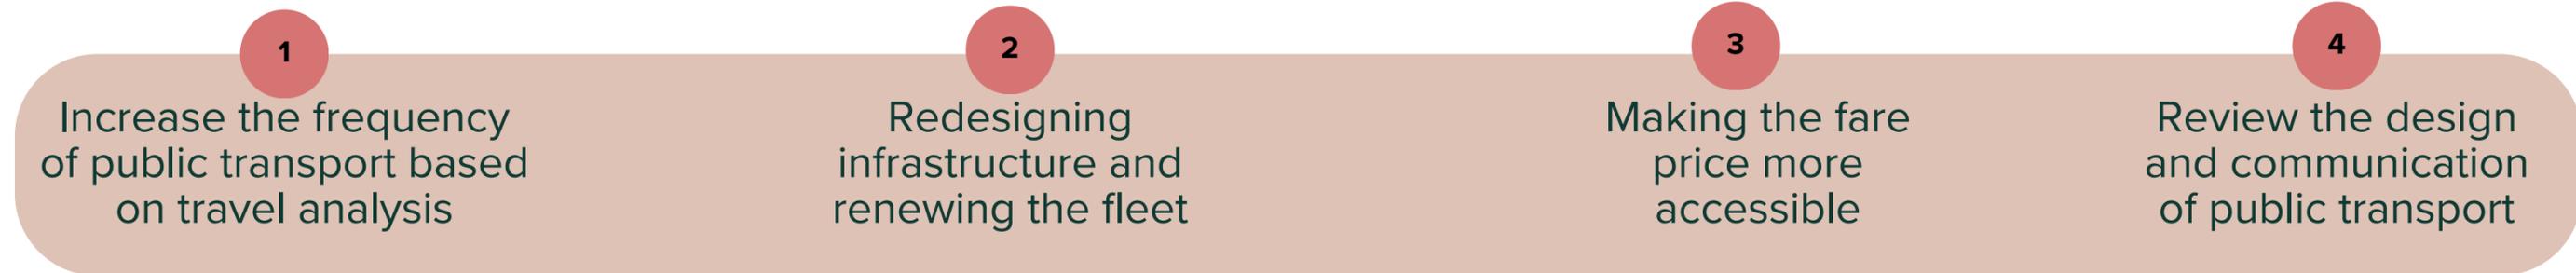

Project

---

# 03 Project

## Objectives, strategies, actions

### ENCOURAGING THE USE OF PUBLIC TRANSPORT

- 1.1 Increase the frequency of the line of the bus 1, 4, 7, 8, 9, 11, 15, 16
- 1.2 Increase the frequency of the rail line Genoa-Ventimiglia to every 30 minutes

- 2.1 Buy new buses accordingly with sustainability objectives
- 2.2 Expand the railway network capacity with enhancement works
- 2.3 Enhance the capacity of interchange points to handle a larger number of passengers.
- 2.4 Making the road infrastructure fit to host different transport categories, adding reserved lanes for PT
- 2.5 Improving public transport's performance towards primary services (schools, hospitals), specially for the inland population.

- 3.1 Offer an integrated fare between public transport on road and on rail
- 3.2 Free of charge for children under 14 years (case study Genoa)

- 4.1 Creation of new signage for bus stops
- 4.2 Activate a mobile application to buy tickets and to research routes
- 4.3 Creating a coherent visual identity for public transport in order to render strong image and easily identifiable

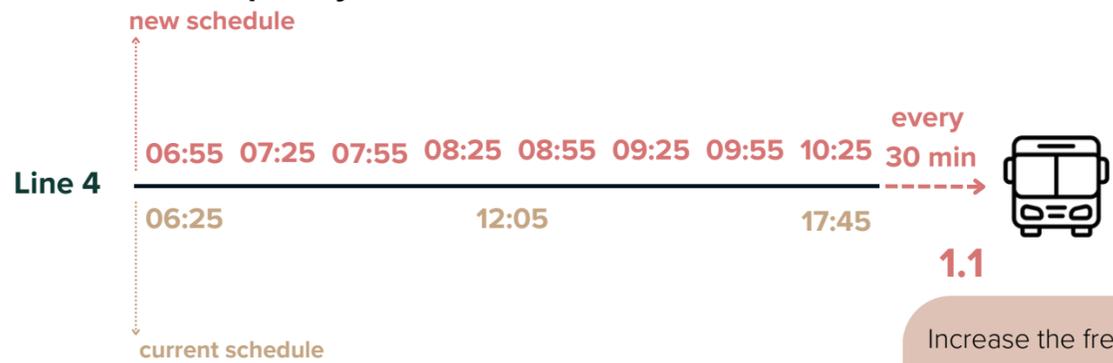

# 03 Project

## Masterplan

Increase the frequency of the railway line Genova - Ventimiglia every 30 minutes

Increase the frequency of the bus routes 1, 4, 7, 8, 9, 11, 15, 16

2.5

New bus line Connecting Castelvechio with Bajardo

2.5

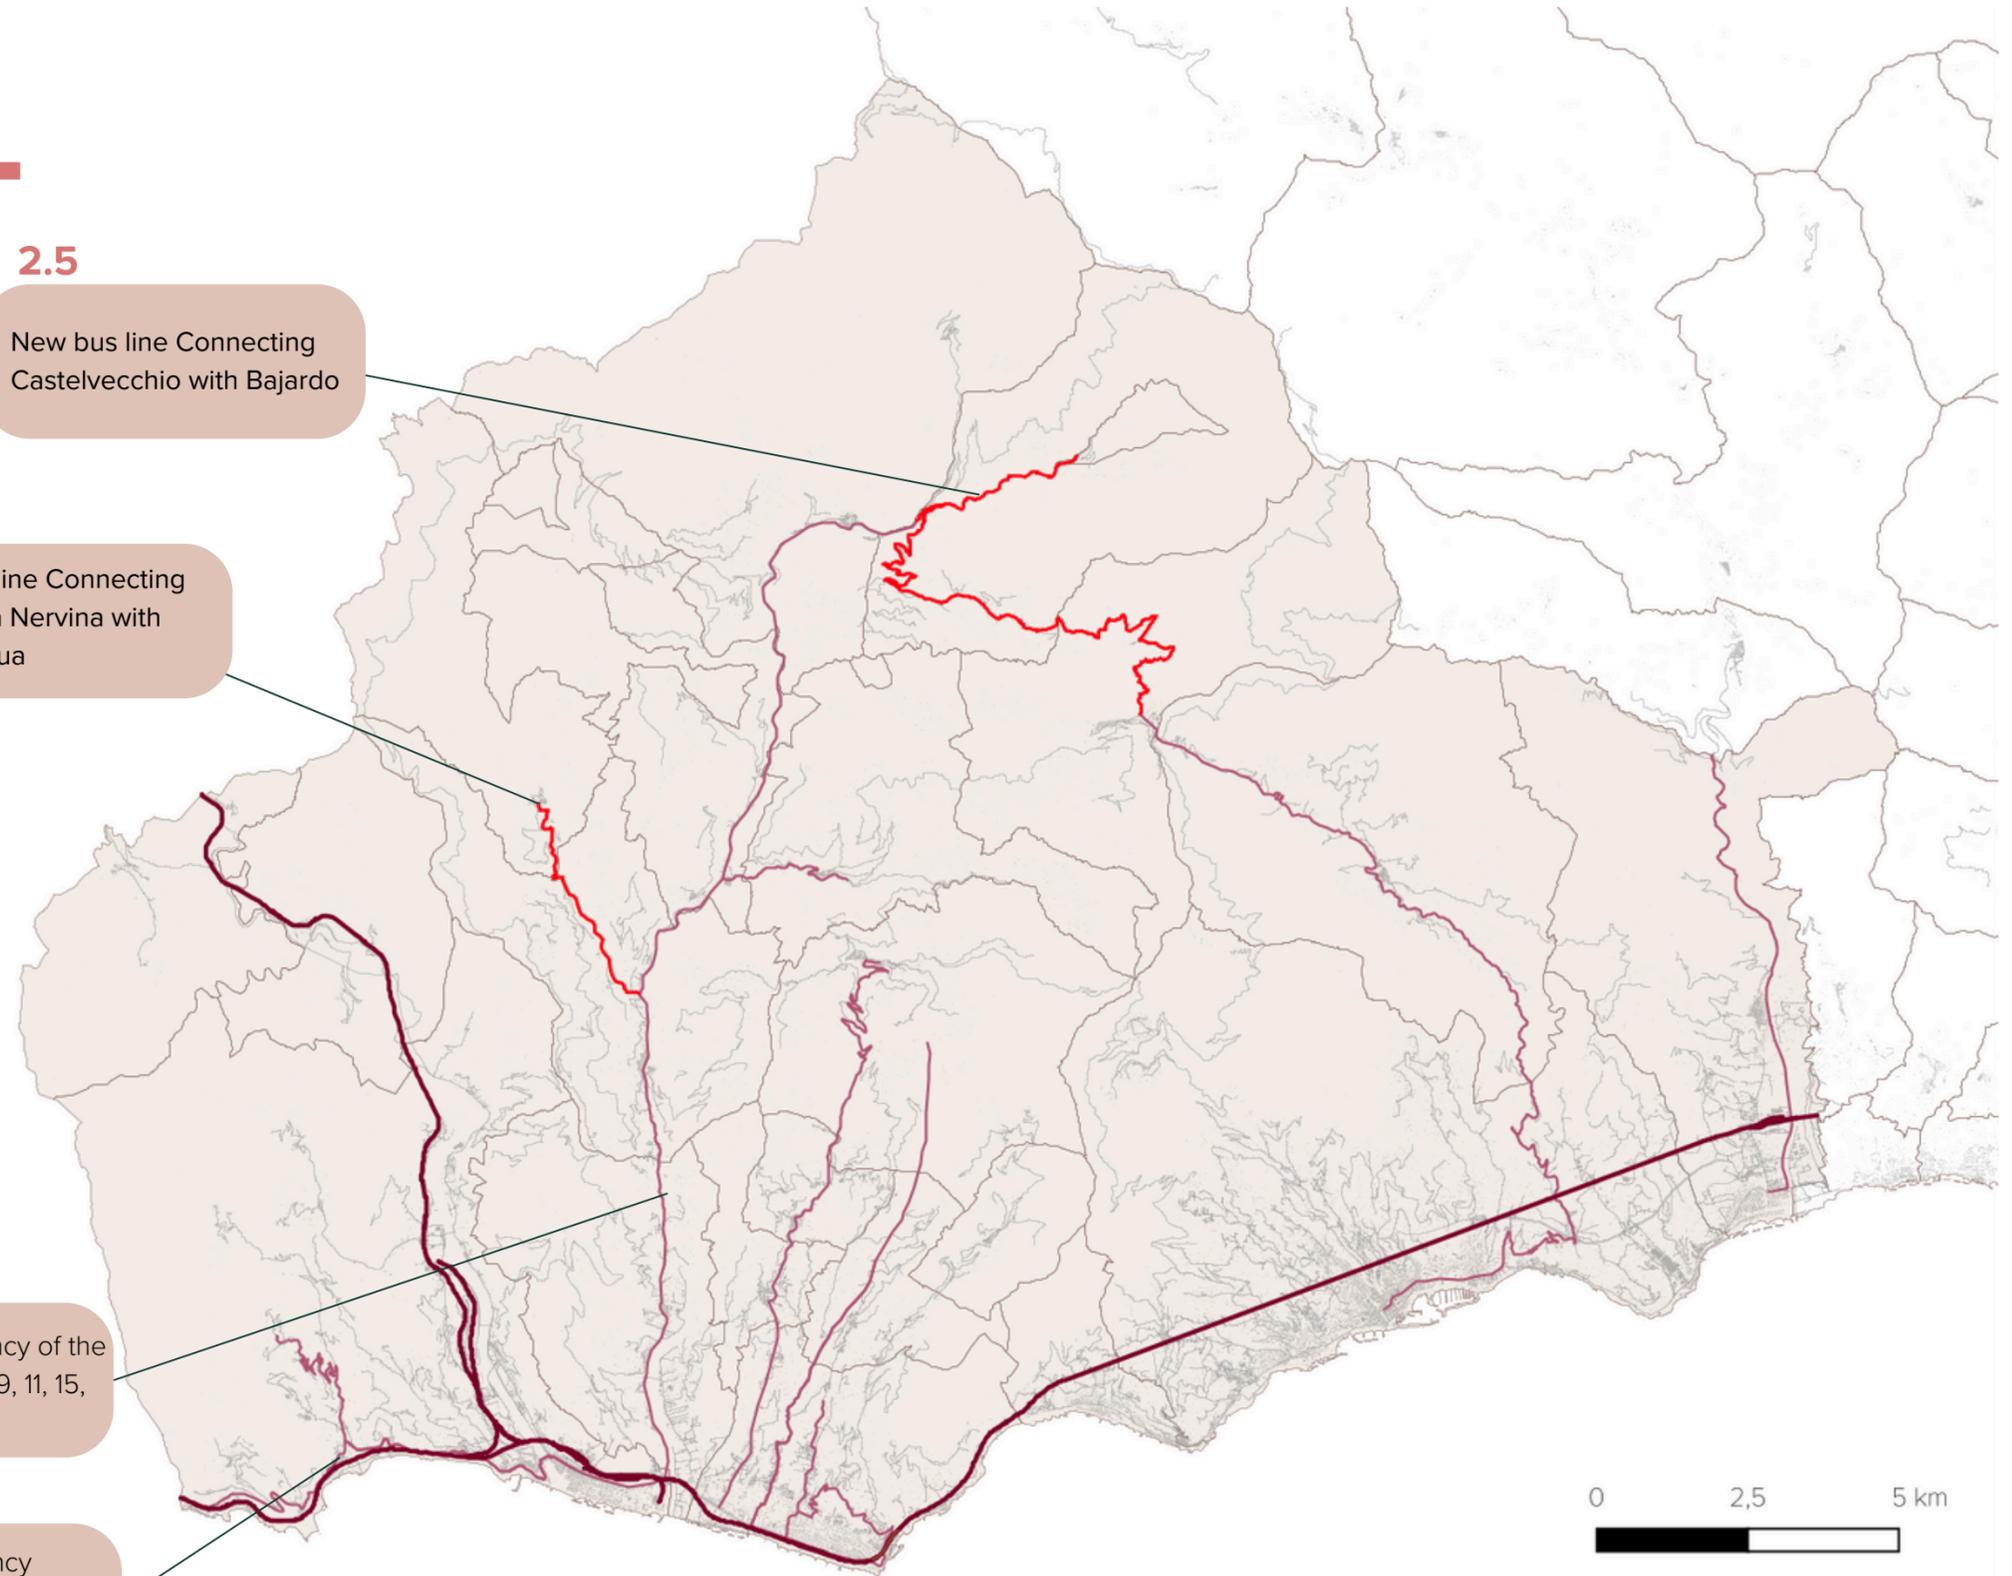

New bus line Connecting Rocchetta Nervina with Dolceacqua

1.1

Increase the frequency of the bus routes 1, 4, 7, 8, 9, 11, 15, 16

1.2

Increase the frequency of the railway line Genova - Ventimiglia every 30 minutes

# 03 Project

## Masterplan

### 2.3

Make interchange points more attractive, such as bus stops

Current bus stops

Example of a bus stops project

### 2.4

Action on the road infrastructure, facilitating the tpl's by inserting them the reserved lanes.

Current street section

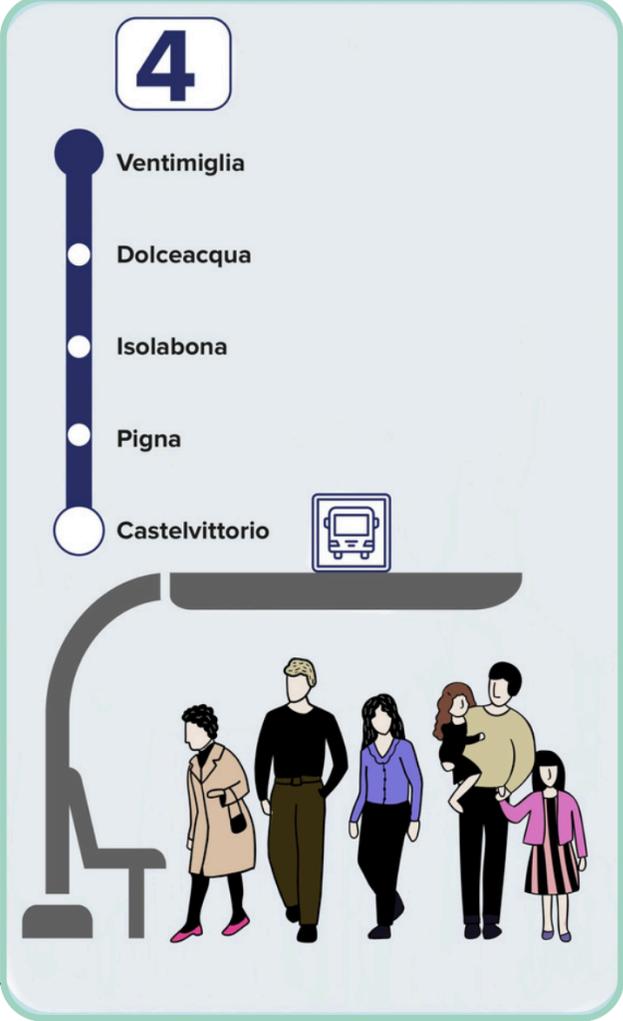

Example of a road section with a lane dedicated to public transport

# 03 Project Masterplan

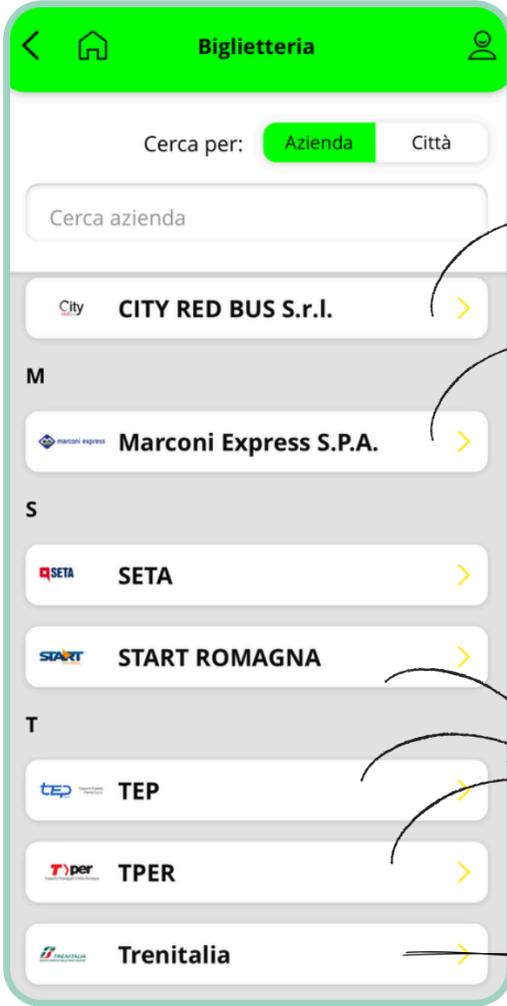

### 4.1

Creation of new signage at bus stop

### 4.2

Activate a mobile application to buy securities travel and carrying out research on tpl

Touristic transport

Airport connection

Local Public Transport

National Railways
